COMPANY

Products and Services

Our products are innovative and modern units,
charging from renewables:

WIND AND SOLAR ENERGY

GSM booster / Hybrid lighting / CCTV camera

WAVE ENERGY

Marine buoy

ENERGY OF VIBRATION

Flashing dancing shoes

Advantages for customers

WE BRING A NEW FUNCTIONALITY...

If some products were not able to operate without wires, now they can. And now you can install them in the field. Or in the garden. Or at the bay. Lighting buoys, GSM boosters, smoke alarm sensors etc. ...

WE REMOVE THE RESTRICTIONS OF THINGS IMPLEMENTATION...

Did you think, that the cost of power lines sometime is greater than the cost of the functional device it feeds? These initial investments restricts the demand. What if there are no excavations, no work and planning permissions needed?

Technological advantages

WE ARE SIMPLE...

Modern technologies should be simple to use in the everyday life. Install and forget paradigm.

WE ARE WELL-DESIGNED AND INNOVATIVE...

Inventions and patented technologies (3 patent granted and 2 in work) are forming the base of the developed products.

WE PROVIDE POWER FROM RENEWABLE ENERGY SOURCES...

Our energy sources are unlimited and free.

Production

OUR PROFIT COMES FROM INNOVATIONS!

- Company production facilities will be located in Ireland and the main logistic routes for spare parts will be build from Southeast Asia and China region.
- The final products will be produced in Ireland, based on our company IP development and innovations.

INTERNATIONAL MARKET IS READY FOR OUR PRODUCTS!

- Renewable energy solutions attracts a lot of attention and support world-wide.
- Our recent achievements make the products reliable and competitive.
- It is one of the most dynamically growing markets in the world.
